The logo for Zirous, featuring the word "zirous" in a lowercase, white, sans-serif font. The letter "i" has a dot above it. The logo is centered over a background image of a modern building with a grid of windows.

Bundles Starting
at \$24,995*

Benefits of EM **True Visibility into JVM**

EM allows for real-time visibility into JVM and application state without instrumentation overhead.

Tracing

Trace in-flight transactions from Java requests to the database sessions and vice versa.

Performance Monitoring

Request performance breakdowns by tier, JSP, EJB, JDBC, and SQL.

Application Server Monitoring

Monitor Application Server events, notifications, reports and historical trends of metrics, using EM's low-overhead Java application monitoring and diagnostics.

Grid Control Quick Start **Application Server Package**

IT systems in today's enterprises are becoming more complex and are harder to monitor and administer each passing year. As systems become more complex and encounter heavier loads, IT professionals are under even greater pressure to ensure system availability. Are you tasked with:

- *Knowing about problems with your applications and infrastructure before your customers?*
- *Optimizing the performance of your applications and servers?*
- *Attending to compliance requirements (SOX, HIPAA, GLBA), service level agreements, or preventing your next system outage?*

Put your mind at ease by implementing Oracle's best-of-breed Enterprise Manager software. Zirous has lowered your entry point into EM through our Grid Control Quick Start: Application Server package.

Included

Target Project Definition

- Discovery sessions to define a high value target environment

Implementation Plan

- Joint creation of an implementation plan, outlining milestones and essential personnel

Implementation

- Implement the hardware and software in your environment

Oracle Enterprise Manager

- Oracle's industry-leading monitoring and administration central console and repository
