Benefits

Comprehensive

Integrates information from your financial performance management, operational intelligence, and transactional applications.

Pervasive insight to everyone, everywhere

Provides relevant insight to everyone, not just analysts. All levels of the organization can see information optimized for their role.

Unified business model

Built on an enterprise information model that unifies metadata across the Oracle BI tools and analytical applications for the lowest TCO.

Hot-Pluggable

Leverages existing IT investments, including Oracle and non-Oracle databases, applications, and custom solutions.

OBIEE Quick Start

Enabling pervasive intelligence demands a new class of BI capabilities – information must be relevant to all users, delivered in time to affect business results, be accessible through a broad range of mediums such as dashboards, alerts, and reports, be integrated seamlessly into business processes and workflow, and scale economically over time to handle nearly limitless data growth and user demands. OBIEE offers this and more for organizations.

The products in the suite are based on a proven Web service-oriented architecture that integrates with an organizations existing IT infrastructure for the lowest total cost of ownership. OBIEE provides complete, relevant insight to everyone in an organization and that, in turn, results in better decisions, informed actions and more efficient business processes.
