# UCM Quick Start

Information that is not proactively managed results in resource bottlenecks, lost documents, duplicated data, security and version control issues, lost productivity, and decisions based on inaccurate information. Oracle Universal Content Management, including Web Content Management, an award-winning enterprise content management platform, manages the entire spectrum of unstructured content – from documents, graphics and Web pages to scanned images, e-mail and records.

Building a strategic enterprise content management infrastructure for content and applications helps you to reduce costs, easily share content across the enterprise, minimize risk, automate expensive, time-intensive manual processes, and consolidate multiple Web sites onto a single platform for centralized management. UCM empowers users throughout the enterprise to view, collaborate on or retire content, ensuring that all accessible distributed or published information is secure, accurate and up-to-date.

#### Included
